To whom it may concern:

It was great working with Randy Triplett and Creative for Kids on our Children's Ministries remodeling project. Randy did an excellent job of consulting with our team before the project by giving us ideas on what could be done to make our facilities look inviting to children and their families.

Then Creative For Kids did a wonderful job designing a logo as well as creating sketches that brought our ideas for design into a visual reality. On site, Randy and his team were a joy to work with and provided more professional advice to benefit our project.

We really appreciated Creative For Kids integrity in working with us on this project. They did a professional job and provided even more online resources in their mural packets and stickers. They gave us a fantastic product at a fair price.

We gladly recommend Creative For Kids to any business or organization that is looking to upgrade their facilities into an environment that families and kids want to visit.

Thankfully,

Mike Reuter
